# Overview of multi - purpose surfaces for running tracks

**Type** Pour-coated surface  
**Properties** High durability and abrasion resistance  
 Energy-boosting elasticity  
**Water permeability** No  
**Thickness** At least 13 mm  
**Colour** Red, green and special colours  
**Application** Stadium running track for peak performance  
**Surface** Extremely UV-resistant, perfect for spikes  
**Superstructure** 3-layer surface:  
 PUR poured and granules dispersed with visible peak  
**Category** International elite sport, IAAF CLASS 1

**Type** Pour-coated surface  
**Properties** Long-lasting and elastic  
 High damping, tested by physiotherapists  
**Water permeability** No  
**Thickness** At least 13 mm  
**Colour** Red, green and special colours  
**Application** Running track surface  
**Surface** Highly UV-resistant, perfect for spikes  
**Superstructure** 1) Base layer 2) Non-porous layer  
 3) Top layer: PUR poured and EPDM granules dispersed with visible peak  
**Category** Professional sport and competition, IAAF CLASS 1

**Type** Structure-coated surface  
**Properties** Heavy-duty  
**Water permeability** Yes  
**Thickness** At least 13 mm  
**Colour** Red, green and special colours  
**Application** School, amateur and professional sport  
**Surface** Rough-grained, tested for spikes  
**Superstructure** 2-layer surface:  
 Base layer rubber granules  
 Top layer spray-coated  
**Category** All-round and competition, IAAF CLASS 1

**Type** Fill-coated surface  
**Properties** Sliding, high elasticity and durability,  
 good ball bounce  
**Water permeability** Yes  
**Thickness** 15 to 20 mm  
**Colour** Red, green and special colours  
**Application** School, amateur and professional sport,  
 ball-playing pitches and all-weather pitches  
**Surface** Highly UV-resistant, allows easy turning  
**Superstructure** Multi-layer surface type, surface formed by flat-laid granules  
**Category** Long-lasting all-round surface

**Type** Fill-coated surface  
**Properties** Sliding, high elasticity and durability,  
 good ball bounce  
**Water permeability** Yes  
**Thickness** Up to 15 mm  
**Colour** Red, green and special colours  
**Application** School, amateur, professional and tennis  
**Surface** Single-layer surface type,  
 heaped, flat-laid EPDM granules  
**Category** Long-lasting all-round surface

Polytan also offers a comprehensive range of special surfaces, e.g. to minimise impact in the event of falls.

# Product range

## Stadium running tracks

IAAF Class 1 / Class 2 certified

- Large stadiums
- National training centres
- Combination facilities for athletics and football
- University sports facilities

## Athletics halls

- Olympic support points
- Performance centres
- Training halls

## School sports facilities

- Schools
- Clubs

## Special training facilities

- Long jump
- High jump, pole vault
- Shot-put
- Javelin

## Safety surfaces

- Children's play areas
- Leisure parks
- Kindergartens
